

# Guia para o registro da licença e da ativação do software

The purpose of this guide is to give users all necessary information on how to register a license and activate **Cabri II Plus for Windows** (1.3 version or newer).

Once Cabri II Plus has been launched (Setup.exe ou install\_cg2p\_1\_3\_eval\_fr.exe) -but not yet activated- all software functions are available for a period of 72 hours beyond which the software will run in a "Demonstration" mode, with SAVE, PRINT and EXPORT functions disabled.

To follow the steps described below, the software must have been previously installed as a standalone or server -not as a client- application.

Se possuímos um **Número de Série de Compra**, the corresponding license must be registered to activate the full functions of the software.

In all other cases, refer to *Other Registration* methods below.
